

MicroSystem Engineers

Thermal Imaging Cameras from FLIR

M/s Micro System Engineers is channel partner of world's leading M/s Flir Systems for their engineering grade Thermal Imaging product range. Out of the entire product range, recommended models for most of the applications are as follows:

FLIR's Thermal Imaging Camera Model # i5
Most techno-economical solution for predictive maintenance of Machineries & Electrical arrangement

FLIR's Thermal Imaging Camera Model # E40
Markets leading feature rich product in its category with temperature range up to 650°C

FLIR's Thermal Imaging Camera Model # T335
High end product with dual optics including option of temperature upgradability up to 1200°C

FLIR's Thermal Imaging Camera Model # A310
Research grade camera with Automation capabilities & can be coupled with MSE's customized software to give desired results to the customers

Supported by – M/s PCI Limited
