

MicroSystem Engineers

Thermography Scanning Services

M/s **MicroSystem Engineers (MSE)** is a strong pioneer involved in providing embedded solutions & high quality product/ services to the customers, employing a dedicated R&D shell for customized engineering.

We offer **Thermography Scanning Services** in co-ordination with our principals M/S PCI Ltd.. Survey will be performed by professional & certified Thermographers. Survey detect hot spots in electrical/ mechanical arrangements and insulation leakage in hot/ cold pipeline or chamber before it becomes serious issue & leads to shutdown or break down. We submit Thermography report to our esteemed customers using high end professional reporting software from FLIR. Reporting will be done with Thermal images as well as Thermal & Visual images as per customers requirement.

Thermography measures surface temperature of any & every object using infrared Thermal Imaging Camera. We use high quality Thermal Imaging Camera from M/s FLIR Systems, Sweden. FLIR Systems, Sweden is renowned & leading manufacturer of vast range of Thermal Imaging Cameras ranging from 80 x 80 pixels to 640 x 480 pixels with temperature measurement range up to 2000° C. IR Camera will be used as per application & requirement of customer. Few Images & sample reporting information are as follows:

Label	Value in Deg. C
SP01+	88°C
LI01 : max	86°C
AR01 : max	101°C

Note –
Thermal Images & Thermal + Visual Images including temperature measurement are for reference purpose only. Report submitted after survey will be authentic & formatted report using high end professional software.

SP01	80°C	SP01	43°C
		SP02	92 °C
		SP03	47 °C
